

Dear FDA,

8865 00 AUG-7 A9:20

I am writing to object to the FDA's rule permitting the irradiation of eggs. Many studies have shown that irradiation alters the nutritional qualities of dairy and egg products. The issue of salmonella comes from overcrowded, dirty factory farms. This danger can be prevented by cleaning up farms. No need for after-contamination treatments. Please don't irradiate, rather hold a public hearing on this matter.

The continued requirement of ~~an~~ irradiated foods to be clearly labeled is appreciated also.

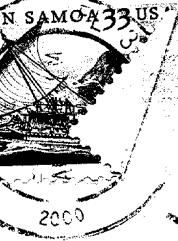

Sincerely,

Tim Lafur
